Washer Extractor (Free Standing)

Capacity
15,30,60 & 120 Kgs

- This machine has an open pocket cylinder and is self balancing.
- The variable speed drive with high speed extraction is suitable for all kinds of washing and dyeing to obtain a worn or stone washed effect with enzyme treatment.
- A micro processor comes standard with the machine which helps to control different programs of wash cycles.
- The cylinder beaters are specially designed to ensure a gentle, rapid and uniform treatment of all fabrics.
- This is an extremely versatile machine that can be used in the garmenting as well as commercial laundry industries.
- A whole laundry of washes including enzyme, stone wash, regular detergent wash to even garment dyeing can be performed via this machine.
- The variable working and extraction speeds help perform the above washes.

Perc Dry Cleaning Machine

- 2/3-self-cleaning tanks.
- Tank to Tank perc automatic transfer.
- Nylon ecological filters.
- Microprocessor Computer with 20 programme memory, manual override, self diagnostic.
- Closed circuit operation.
- Electric or steam heated.
- Continuous or batch distillation.
- Large loading and still door.
- Exhaust door vent fan with active carbon filter.

Capacity
6,8,15 & 25 Kgs

Vertical Washing Machine (Front Loading)

- Complete stainless steel on the inner basket and the outside drum and all internal water contract parts.
- With switch operated control panel with auto timer , digital temperature indicator / controller, auto forward / reverse timer / complete informative panel.
- Drive is effected through heavy duty , dynamically balance graded cast iron pulleys with matched v belts of most reputed make.
- Main and counter shaft bearings of reputed make used to withstand axial / radial loads.
- Identical wash results for different types of washes, softner, enzyme, bleaching and dyeing.

Capacity
15,30,60,100,150 & 200 Kgs

Horizontal Washing Machine (Side Loading)

Capacity
15,30,60, 100, 150 & 200 Kgs

- Fully stainless steel construction, including the inner basket and outer drum end plates and control panel.
- The reduction pulley system ensures a smooth and soft drive.
- Switch operated panel box and easy to operate.
- Hot forged end flange shafts for long life.
- Unique design of raising the door height above the centre of the drum, increases liquor holding capacity ; and thereby better loading ratios.
- Calibrated level indicator to see water level.
- Large drainage valve ensures quick release of water and very low maintainence.

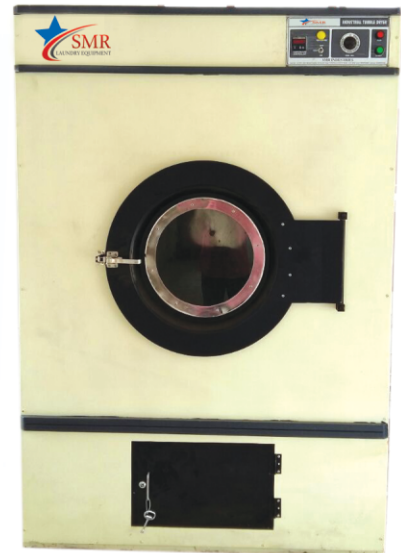

Capacity
10,15,30 & 50 Kgs

Hydro Extractor (Direct Drive)

- The inner basket and the outer drum are made of stainless steel, the inner basket is directly mounted on the drive motor.
- The motor is suspended with a coaxial setup along with thermal and anti humidity insulation.
- All the machines have the necessary door lock mechanism and optional continuous current braking system to assure a simple and safe operation.
- The design provides a quick, self balancing, noiseless and vibration-less performance.

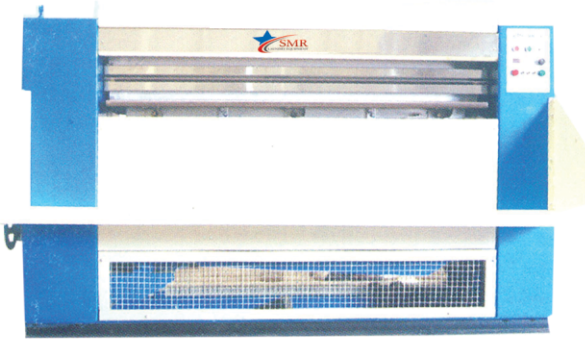

Tumble Drier

- Inner stainless steel basket and outer painted MS body.
- Switch operated auto controls such as auto reverse, digital temperature indicator / controller. Forward timer with pause timing and with total time.
- The drive is through balanced closed grained cast ironed pulleys with matched ' V belts drive, with pedigreed bearings reputed make / of sustain radial and axial loads.
- The inner stainless steel basket is fitted with CNC designed stainless steel paddles to ensure smooth tumbling effect.
- High load capacity ratings , self-cleaning lint screen and other designed features make this drier a space and energy saver and guarantees faster drying time.
- As a optional dryers and also available in Electric, steam , diesel and gas heated .

Capacity
15,30,60 & 100 Kgs

Flat Work Ironer (Electrical or Steam Chest Heated)

Capacity
ECH 1600

Capacity
ER 2000, 3000

- India's most versatile single roller electrical / steam calendar machine.
- Low Power consumption. The machine is front feed and front return type.
- Switch operated panel control with digital temperature controller.
- Hand operated roller lifting and lowering option.

Saree Rolling Machine

The Saree Rolling Machine "SRM" model series is a five roller industrial "Rollr Heated" ironers. Our economic range flatwork ironers offer you an excellent combination of efficiency, quality and convenience making it the finest special designed saree roller available in the world.

Standard features:

Construction

- Front Feed and opposite return type

Technical

- Finger guard protection
- Heat proof padding for longer life
- Roller heated (GAS FIRED)

Electrical

- User friendly switch operated panel controls

Vaccum Ironing Table

Electrical Steam Boiler

Spotting Table

Trolley

Air Operated Presses

Coller & Cuff Press

Air Operated Presses

Pant Press

Oil Fired Boiler

Shell Type

Capacity :50 & 100 Kgs

Oil Fired Boiler

Coil Type

Capacity : 200, 400, 600 & 800 Kgs

About us

SMR Industries is one of the top branded laundry equipment manufacturing company in India. Started with a huge freeze free manufacturing facility outlet with 15000 Sq. Ft. area in Vijayawada with 20 years of experience in planning and production of laundry machinery under the brand name of **SMR Laundry Equipment**. Our vision and mission is to produce and supply our most trusted product to customers at very economical budget.

Apart from end user supply our factory is engaged in undertaking bulk manufacturing contracts from self labelled local trading companies majorly in **Tamilnadu, Karnataka, Kerala, Maharashtra, Gujarat & West Bengal regions.**
